

KEY PROGRAMMING DEMONSTRATIONS

Hickleys, the vehicle key programming specialist, are explaining the opportunities in key programming at a number of presentations being held around the country during 2012.

The ability to copy or program vehicle keys and remotes adds additional business to service and diagnostic garages, car sales and main dealers, plus key cutters and auto locksmiths.

Unlocking... the Key to Success

The evening presentations will explain the equipment required, the technical backup available and the methods used, offering a new service to your existing or potential customers. Using the MVPPro or Zed-Bull key programming and cloning diagnostic testers, payback scenarios of as little as 7 months (or 30 key programs) can easily be achieved. Purchases using lease terms can introduce you to immediate profits as the equipment is paid for from the profit earned.

FREE

The presentations include live demonstrations on key programming on a variety of vehicles, the low cost tools available, the huge range of keys and remotes available on a next day service and the full range of backup services included in the purchase price.

For the diagnostic specialists we will also be demonstrating immobiliser or engine ECU eeprom removal, reading and reprogramming, adding an extra dimension to your services.

The evening presentations, starting at 6.30pm, will be held at the following location:

Smith Bro's, 50 Broton Drive, Halstead, Essex. CO9 1HB
AVS, Unit 6 Sutton Fold, Lancotts Lane, St Helens, WA9 3GL

28th March 2012
29th March 2012

To attend these presentations, it is essential that you reserve your place as soon as possible as numbers are strictly limited. To apply, please fax back the form overleaf, or call Nicky Summers on the number below.
